

# Opinion Estimates for 632 British Constituencies

Chris Hanretty\*      Nick Vivyan†

November 13, 2014

This table shows our estimates for constituency opinion on three topics.

1. Average views on redistribution in a constituency. This is measured on scale that runs from 0 ('Government should try to make incomes equal') to 10 ('Government should be less concerned about equal incomes'), so that higher scores correspond to more economically 'right-wing' sentiments.
2. Percentage support for British exit from the EU within a constituency.
3. Average views on the cultural impact of immigration in a constituency. This is measured on a scale that runs from 0 ('Bad') to 7 ('Good'), so that higher scores correspond to being more favourable to immigration.

For each constituency and opinion topic, we list our overall estimate and a corresponding margin of error (i.e. 95% confidence interval) in brackets. All 632 English, Welsh and Scottish constituencies are listed in alphabetical order. Note that these estimates draw on survey data collected by the British Election Study between May and June 2014, and that opinion may have evolved since then.<sup>1</sup> For further details on the method we use to estimate constituency opinion based on national survey samples, see <http://www.constituencyopinion.org.uk/>.
